Picture Perfect Adjectives

Rationale: One of the big focuses in First Grade is teaching students the different parts of speech - Nouns, Verbs and Adjectives. This game will give students the opportunity to practice using Adjectives correctly.

Objective: To encourage students to use Adjectives in order to describe their picture.

Materials:
- Large set of calendar pictures, mounted on the same color card stock and laminated
- Small set of calendar pictures (from the back cover), mounted on the same color card stock and laminated

Procedure:
1. Students will work with one partner. One student will have the pile of large calendar pictures and will choose 1 and keep it hidden from their partner.
2. The other student will have the pile of small pictures and spread them out in front of them.
3. The student with the large picture will begin to describe their picture to their partner using only adjectives. For example: If the student is looking at the large picture of the tractor in the snow, they might say, “cold”, “white”, “hard”, “red”.
4. The partner with the small pictures will try to guess the picture that their partner is describing. When they think they know, they will hold up the small picture and see if they are correct.
5. The game can continue on until both students have had a chance to practice using Adjectives and describing all of the large pictures.
